BIOSKY STICKER

Corrector of the biofield of the human body and the negative electromagnetic radiation of electronic devices.

INFORMATION GUIDANCE FOR BIOSKY STICKER

BIOSKY STICKER is a modification of BIOSKY photonic crystal in shape of sticker.

BIOSKY STICKER is a photonic crystal for biofield harmonization and electromagnetic radiation neutralization.

BIOSKY STICKER can be placed to mobile phones, Wi-Fi routers, TV, PC screens, laptops, tablets and other devices which are sources of electromagnetic radiation.

BIOSKY STICKER works based on the principle of conversion of EMF radiation into right circular rotation frequencies, which are favorable to humans, animals, birds, and plants.

Why do we need BIOSKY STICKER?

Using BIOSKY you create a safe space around you.

You protect your biofield from unnecessary interferences, harmful electromagnetic radiations and impact positively all live nature.

Your body will not be disturbed by EMF and will go in self-restoring mode and homeostasis.

According to our research, the effectiveness of Bio-Resonance devices like Trinity and Actiway improves significantly in places where there is no electromagnetic radiation. In the space free from electromagnetic smog the body 'hears' better the useful frequencies of bio-resonance devices. Using the BIOSKY stickers at home will increase the effectiveness of Trinity and Actiway and tune your body to the 'healthy' frequencies.

What is the difference between BIOSKY STICKERS and BIOSKY PHOTONIC CRYSTAL CARD?

BIOSKY STICKERS are used for sources of electromagnetic radiation. That is why they are made in shape of stickers, which are easily stuck to any surface. It is not intended to be placed on the body.

BIOSKY PHOTONIC CRYSTAL CARDS are used for body protection and harmonization and need to be used on the body.

TECHNOLOGY DESCRIPTION

BIOSKY STICKER is a multi-layered bulk structure made of special metals alloys and dielectric materials. BIOSKY is a reliable super high frequency converter which transforms radiation into large biofield with right circular rotation which beneficially affects biological objects and humans. The shapes of the resonant structures and the characteristics of the photonic crystal are calculated and formed based on the interaction of the electromagnetic fields with biological objects, water structures and chirality law.
